Income-Qualified Rebates

Access to affordable electric vehicle and bicycle options is a key barrier to the adoption of transportation electrification, especially for income-qualified customers who may experience increased barriers to affordable and clean transportation technologies.

To support income-qualified customers, PNM offers a \$4,000 instant, point-of-sale rebate on the purchase of an eligible electric vehicle and a \$1,000 rebate for an electric bicycle at participating dealers. Purchaser must meet income eligibility guidelines.

Submission of this form is necessary to allow participation by a customer who is a tenant at the property where the PNM account is maintained by the landlord.

ACCOUNT HOLDER INFORMATION

I attest that tenant named above is a tenant of the property identified, and their utility costs are incorporated into their rental agreement.
